Project Name - Personal Blog (Web Based)

GitHub repository - https://github.com/Rahathan1453/softDev_1453

Project Description

A personal blog is that sort of blog that has grown gradually over the span of years. A blog simply is a sort of website that mainly focuses on written content.

Personal blogs have gained a lot of popularity with time and have become a great source of sharing experiences, feelings, thoughts or even knowledge about anything and everything.

A blog is an online journal or informational website displaying information in reverse chronological order, with the latest posts appearing first, at the top. It is a platform where a writer or a group of writers share their views on an individual subject.

Every person who wishes to convey a message to someone has to make sure to choose the right medium first. With most of the population shifting their preference to technology, the mediums for sharing information have also changed to a great extent.

A personal blog is that sort of blog that has grown gradually over the span of years. A blog simply is a sort of website that mainly focuses on written content.

Personal blogs have gained a lot of popularity with time and have become a great source of sharing experiences, feelings, thoughts or even knowledge about anything and everything.

Language – Python3

Framework – Flask

Feature -

- Islam
- Tech
- Graphics
- Book Review

Platform – Visual Studio Code

Libraries – Flask Libraries

Project Scheduling – 45 days

Contributor - Rahat Hasan

Conclusion – It might be a simple project but greatly help me to categorized the knowledge that I've gained.
