Project Description

Problem Statement

QUIZ system is a software developed to conduct an Online Quiz based. Number of questions to be answered. Quiz is started by displaying one question with four options. If the answer is correct, score is incremented by five and no negative marks for wrong answers. Final score will be displayed. The project should be very easy to use.

Programming Language

- Java

Requirements

- Java JDK
- Java IDE
- SDK
- Android Studio

I will try to give my best for making this project.

Features

- Great design is the key for Quiz Games.
- Have interesting questions.
- Giving users an option to reach out.
- Collecting useful data from users.

Contribution

I will design whole project alone.
