Student Name: Mardia Reza

Student ID: 1846CSE00648

Student Name: Sanjida Akhter

Student ID: 1846CSE00653

Objective: This a simple survey application for student satisfaction rating.

Introduction:

Programming Language

➤ Java

BACKGROUND:

Android Architecture

Android is a Linux-based open source operating system. And the Android architecture is formed by four layers from bottom to top as Linux Kernel, Libraries and Android Runtime, Applications Framework and Applications

Android Studio

The official and widely used Integrated Development Environment (IDE) software used for Android applications development which was first announced on 2013[10]. It has been provided by Google to replace Eclipse ADT. It has packages to run on Windows, Linux and Mac OS X operating systems.

Features

- **Offline mode.**
- **secure**

Advantages of these app:

- 1. Easy to collect student information,**
- 2. Offline system,**
- 3. Easy to Use**

Future Scope and Development:

- 1. It should be for professional work,**
- 2. Adding Database,**
- 3. Adding Login Page**
